# Fuel Order Management And Dispatch (FOMD)

Close the loop on fuel supply management from orders through billing.

The FOMD solution from Axxis Software centralizes the management of fuel inventory, orders, dispatch and procurement, and provides real-time integration for managing rack and contract fuel prices.

Market Challenge

Petroleum marketers who move high volumes of fuel face shrinking margins if they don't have access to an all-in-one fuel management tool. Most depend on a patchwork selection of accounting software and manual systems, but can't quite see the full picture. Crucial pricing decisions are often based on stale data, and manual processes inhibit the ability to take advantage of price fluctuations.

How We Help

Axxis FOMD integrates real-time pricing – a core competency of the platform – with inventory tracking, order processing and driver scheduling to provide you with an end-to-end solution for automated fuel supply management. Gain greater control over logistics, including inventory status/forecasting, alerts/notifications, fuel sourcing and dispatch status.

Benefits

- Take orders, schedule delivery and send confirmations to carriers and customers
- Batch and dispatch orders together or confirm and dispatch emergency orders on the fly
- Manage and forecast inventory with auto generated burn rates, continuous tank monitoring and market adjustable minimum and targeted tank levels
- Receive alerts when inventory hits critical points to reduce fuel run outs
- Establish market conditions for inventory, and change parameters based on market changes
- Pick the right product from the right supplier at the right terminal and discover delivered cost
- Manage dispatch from anywhere, at any time with cloud-based tools
- Assign specific truck and trailers to drivers, and compartmentalize fuel within each truck

Axxis Anywhere BI Analytics

View heat map of prices to determine if product is available, and where to pull it. Compare rack and contract prices to determine which is better. Know where you stand in a contract to take advantage of it.

TransactionRite

Receive delivery information directly and easily bill customers.

MobileRite

Use mobile technology to communicate with drivers. Confirm load-entry details for product pick-up, including # of gallons and BOL. Confirm delivery-entry details for product delivery with information automatically sent back to the main office and no need for physical transaction documents.
